

Quick Dog Training Treat Bags

Product functions/features:

1. The tough tension gasket design keeps the three-dimensional shape of the bag not flat or collapsed, and it is durable and stylish; the curved surface on the back has an engineering curvature, which better fits the curve of the human body.
2. There is an elastic anti-scattering and anti-drop net pocket at the mouth of the bag, and the semi-closed opening is easy to take and put away, ensuring fast food intake and preventing items from spilling.
3. The design of super large clip-on buckle and high-strength nylon hanging ears can meet the wearing needs of multiple scenarios.
4. The net pocket on the rear side can hold snacks, keys, garbage bags and other small items.
5. External high-strength waterproof fabric design, anti-scratch and moisture-proof.
6. There are 3 colors to choose from.
